

MIT5502

Developing Enterprise applications

Proposal Template

March 2020

| | | |
|---------------------|---|---|
| Project Title | <i>The student should write the project title that they will be working on. E.g. Online Shopping for Shoe store</i> | |
| Company | <i>The student should write the name of the company (real/virtual) that they have proposed to develop the application for.</i> | |
| Logo of the company | <i>Student's can frame up a new logo or cite a logo of a company that they are planning to work for. The logo needs to put across the application to show uniformity in headers/footers of the system.</i> | |
| Products | <i>The online store needs to have a product / category of the products sold from the above said given application. The student needs to list the product with their category to work on.</i> | |
| Features | <i>The application can have many features including login, logout, search, payment options etc. The student is expected to list the features and expected output of each of the features in this component.</i> | |
| | | |
| Sr. No. | Student id | Student name (highlight the corresponding student) |
| 1. | | |
| 2. | | |
| 3. | | |
